

Impact Data Books

DATA BOOKS

The concept of a data book is not new. But having a tailor made book that you can layout and design to match the exact target you train off of is. The Impact Data Book offers over 230 different page types to choose from. When used properly a data book can make the difference between hitting and missing your target with your first round. Having a reference guide in which you can refer back to your last shot and retrieve your data from will allow you to do just that.

Generally most data books on the market today are designed and sold how the designer of the book conducts their training or how they think other people should train. It has been my experience that when using these other data books that I throw away at least one third of these books, due to the fact the targets or pages don't correspond to what I need to record my shooting activities on.

Well look no further, Impact Data Books puts an end to that and allows you to order and setup your data book to correspond with your training and qualification courses so that you don't have to modify your book to fit your needs. Your book is already setup and 100% functional, because you designed it that way.

Impact Data Books can also do custom design data book pages or complete books for schools or agencies. We can make these pages or books match your day to day course curriculum, or qualification courses.

Data Book Specifications

Custom Data Book

This book was designed with the shooter in mind. Our goal is to give you the shooter a book that is designed 100% around your shooting needs and desires. The days of having a book full of pages that you have no use for are long gone.

Our modular data book will give you flexibility and diversity that will allow you a variety of choices. These choices will range from book size, paper type, binder color and of course the actual data collection pages that you will choose that will correspond to the targets you actually shoot at.

When ordering this book you will choose either the standard size 9 1/8 x 6 1/2 inch 3 ring binder or the pocket size 5 1/2 x 4 1/4 inch 3 ring binder.

Your choice of paper will be standard 80 weight executive stock paper or Rite in the Rain water resistant type paper.

Your durable plastic three ring binder will be offered in tan, green and black.

The book will come with a set of our standard index pages that will have everything from wind charts, reference information and general ballistic tables. You the shooter can then choose 8 sets of double sided pages (1 set of pages equals 10 double sided pages) to complete your book.

Your complete book will be 100 double sided pages that will give you 180 usable data collection pages and 20 pages of reference material.

Premade Data Book

This book was designed to offer a premade book for the beginner or advanced shooter that may not know exactly what they need in their data book, and to assist our stocking dealers with a book that provides plenty of data collection pages for its customers.

Our premade data book will give you a great off the shelf book that offers you a variety of the most common target types that you will encounter during a basic range session. Our goal was to eliminate the over abundance of range card, sketch pages and note type pages that you more commonly find in other premade books.

When ordering our premade book you will choose either the standard size book measuring 9 1/8 inches x 6 1/2 inches or the pocket size book measuring 5 1/2 inches x 4 1/4 inches.

Your choice of paper will be standard 80 weight executive stock paper or Rite in the Rain water resistant paper.

Your durable plastic covers will be offered in tan, green, or black.

This book includes:

- 10 - Standard index pages
- 20 - Circle Pages
- 20 - Square Pages
- 15 - Silhouette Pages
- 10 - Blank Pages
- 5 - Cold Bore Pages
- 5 - Mover Pages
- 5 - Unknown Distance Pages
- 3 - Notes Pages
- 3 - Round Count Pages
- 2 - Range Card Pages
- 2 - Sketch Pages

That's 100 double sided pages of data book that gives you 180 pages for data collection and 20 pages of updated and useful tables, charts, formulas and reference materials.

Refill Sets

The advantage of having a modular book is the fact that you can add or remove pages as you need to. This is a versatile option for any active shooter. Target refill sets for your book can be purchased from our website.

Impact Data Books Round Count Books.

Each rifle should have its own dedicated round count book that stays with the rifle for the life of the rifle's barrel. That book should be passed on from owner to owner so that a proper round count for that weapons barrel is known.

Our round count book comes with a heavy card stock cover and a 80 weight paper with a single hole punched in the top left corner to allow you to add a piece of string and hang it on your rifle when being stored in your safe or vault.

We can also custom design these round count books with your unit, agency or company logo. These books are a great add on accessory for gunsmiths to include with every new rifle they build and sell.

Round count books also work great for pistols as well.

Ordering:

Ordering is made quick and easy thru our secure hassle free online website. Simply visit our website at www.impactdatabooks.com and create an account. Once your account is created you can easily shop and get what you need added into your cart and pay for your order when you are ready. Your order will be processed and shipped out right away.
